
SUMMARY

I have various skills and experience in front-end and back-end development. But Mostly , I work as a Backend Developer and currently I am a Freelancer

In my previous roles, I have demonstrated expertise in a variety of programming languages, including JavaScript and PHP. I have also worked with a number of frameworks including JQuery and Laravel.

Overall, my experience as a Frontend and Backend programmer, coupled with my passion for delivering innovative solutions, makes me a valuable asset to any organization seeking to develop cutting-edge software applications.

EDUCATION

ITPU University

Software engineering

Guliston-academy

Backend programming

IT-PARK

Full-Stack programming

EXPERIENCE

IT LIVE Guliston

Sirdarya, Uzbekistan

IT LIVE is a company mainly focused on education and I worked there as an assistant teacher and also as a Backend Developer I was responsible for developing and implementing a website that meets the needs of the clients. During my 6 month time at IT LIVE, I collaborated on several real-world projects, including Telegram bots, online magazine websites, and government projects.

Also, ITLIVE has helped me improve my skills in various programming languages, frameworks and tools such as JavaScript, PHP, Laravel and MySQL.
